1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

- 2. Claim 7 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, claim 7/3 has not been further treated on the merits.
- 3. Claim 2 is objected to because of the following informalities:
 this claims need grammatical revision. Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1,3/1, 4/3/1, 5-6,8 are rejected under 35 U.S.C. 102(b) as being anticipated by Cais et al.

Cais et al. teach an image forming apparatus having a latent image carrier drum 50 (see Fig.s 3A, 3B, and 4) having a thin cylindrical body and a deformation preventing member 100 positioned within the interior of the drum. The deformation preventing member is twisted in the axial direction so as to form a plurality of blade

structures 102 from one end to the other end. The deformation prevention member is made from plastics which have elasticity (col. 6, lines 56-61). The diameter of the deformation prevention member is larger than the drum (col. 7, lines 17-24).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 7/1, 7/(4.5) are rejected under 35 U.S.C. 103(a) as being unpatentable over Cais et al. in view of Ohkubo et al.

Cais et al. taught supra discloses most of what is claimed except the deformation preventing member being made of rubber. Ohkubo et al. teach an image forming apparatus having a image forming drum 3 with a deformation/noise preventing member 21 made of rubber disposed within the interior of the drum. It would have been obvious to one of ordinary skill in the art at the time the invention was made that the deformation member could be made from rubber because vibrations from the imaging drum can also be absorbed as taught in Ohkubo et al.

Art Unit: 2852

- 6. Claims 2,3/2,4/3/2,7/2 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fritz et al., Godlove et al., Tanaka et al., Sugiyama (JP), Sakurai (JP), JP# '348, Sato (JP# '384), Tsuzaki (JP), and Sato (JP# '280) all teach imaging drum having deformation/vibration/noise absorbing members within the interior.
